

Points to bear in mind:

# Safety

- Always observe your test tube whilst it is in the test tube rack.
- Always stand up during experiments. Kneeling can be unsafe.
- Only hold up reacting substances in a test tube if told to do so.
- Don't place any substances near your face or others' faces.
- If you are required to smell a gas, do it cautiously, waving your hand over the top of the test tube, before inhaling.
- Only use chemicals as instructed by your teacher.
- Remember to act safely in the laboratory.
- Never joke while during experiments.
- Always wash your test tubes and clear away before taking off your lab coat.
- Think before you act!
