

# Chemistry Review of the Year 2011

# The Chemistry Department Takes More Steps Forward

As always, this year has been another exciting year in the Chemistry Department. There has been more progress in a number of important areas. Students have entered international competitions (via Rego Science Club), the website has now become two and new study manuals to assist student studies were issued at the beginning of September. There is a new screen and projector in Laboratory 114 and all didactic materials have been upgraded during this academic year.

# The Chemistry Department Takes More Steps Forward

Students have thus benefitted from more information being made available to them and website news items have been published continually. There are many Rego Times articles so any keen student can find out about a number of scientific topics by clicking their mouse. Rego Science Radio is now on-air too. Some of this year's news is reported online.

In addition:

- If you are a Year 10 or Year 11 student, you can now access a PowerPoint presentation preview of what you are going to study this year. Thanks to Microsoft®, it's a fantastic new way of showing you slides online.
- Practical sessions in the laboratory are now undergoing scrutiny. All experiments are being assessed in order to minimize risks to students. UK guidelines will be employed to guarantee the highest standards are applied.
- Primary staff are also more than welcome to come for assistance. Please come into our laboratory if you need some help performing an experiment or wish to do a demonstration. We have lots of resources and ideas to assist you.

I hope you too can contribute to further develop our department in the new academic year.
